ISMAIL ALI

Software Developer

📞 07596 595624 @ ismailyma01@gmail.com 🔗 https://ismailyma.github.io/portfolio/

📍 Birmingham, UK

SUMMARY

I'm a full-stack software developer with experience in working collaboratively and creatively to solve real-world problems within remote, cross-functional, technical, and agile teams. A keen curiosity in maths, physics, and problem-solving bore a real passion for the world of tech and innovation within me. Furthermore, the added flexibility of applying my technical skills to bring about real impact propelled me to embark on a role as a developer.

SKILLS

Coding

HTML   CSS   Javascript   ReactJS   NodeJS

Project management

Trello   Jira   Confluence   Git   GitHub

VOLUNTEERING

Fundraising Assistant

Africa Relief Fund

📅 06/2016 - Ongoing

THE SCHOOL OF CODE BOOTCAMP

During the boot camp, I learnt how to become a collaborative, creative problem solver and a full-stack developer. I worked on two main projects where I collaborated in agile teams, implementing agile principles throughout the SDLC. We worked in short iterative sprints, completing daily tickets and delivering working software every few days. We created user personas and stories, wire-framing, story-pointing, post-mortems, daily stand-ups, pair/mob programming, sprint reviews and retrospectives. We also used various tools for project management such as GitHub, Trello, Jira and Confluence.

PROJECTS

Calculate

🔗 https://ismailyma.github.io/calculator/

A fully responsive web app to help with everyday calculations.

- HTML 5
- CSS 3
- Javascript ES6

Mario Club

🔗 https://ismailyma.github.io/mario-club/

Here I created a sleek and responsive Mario Club landing page for all Mario lovers to enjoy.

- HTML 5
- CSS 3
